For immediate release:

Washington, DC – October 15, 2008 – The State of Wisconsin, Department of Administration, Division of State Facilities has contracted with Connolly Architects to help develop a set of guidelines for architects and engineers in designing new state projects in BIM.

Further studies will look at future directions long term vision for Capital Facility Planning, GIS, Data Storage and Management, and Facility Management using the information contained in the models.

A Building Information Model (BIM) is a digital representation of physical and functional characteristics of a facility. As such, it serves as a shared knowledge resource for information about a facility forming a reliable basis for decisions during its design, construction and operation.

About Connolly Architects

For over 25 years, Connolly Architects has served Milwaukee area commercial, corporate and healthcare businesses. Connolly Architects is a leader in Building Information Modeling technologies and Integrated Project Delivery. Visit www.connollyarchitects.com
