For immediate release:

Washington, DC – December 15, 2012 – Kevin J. Connolly, AIA was appointed by The American Institute of Architects (AIA) president Mickey Jacob, FAIA to serve as Director on The Building Smart Alliance Board of Directors. He joins approximately forty other directors representing various capital facility industry stakeholders and owners.

“Kevin was the logical choice” said AIA staff resource architect Markuu Allison. Connolly has been on the cutting edge of design and construction technology since starting his firm and has been a leader in Building Information Modeling tools and processes since the late 90’s. He pioneered ideas in integrated practice, is one of the key leaders in AIA’s Integrated Project Delivery (IPD) initiative; and championed AIA’s public position policy on Software Interoperability.

Connolly will serve as liaison to AIA staff and members on technology developments and direction affecting the capital facility industry in general and the profession of architecture in specific.

About the Building Smart Alliance

The Building Smart Alliance is the North America chapter of Building Smart International. It operates within the congressionally authorized non-profit National Institute of Building Sciences. Its mission is to “Improve all aspects of the facility and infrastructure lifecycle by promoting collaboration, technology, integrated practices and open standards.” It is accomplishing its mission by leading the creation of tools and standards that allow project to be built electronically before they are built physically using Building Information Modeling. About the American Institute of Architects

Based in Washington, D.C., the American Institute of Architects (AIA) has been the leading professional membership association for licensed architects, emerging professionals, and allied partners since 1857. It represents and supports a membership of over 83,000 worldwide.

About Connolly Architects

For 30 years, Connolly Architects has served the commercial, corporate and healthcare businesses locally and nationally. Connolly Architects is a leader in Building Information Modeling technologies and processes. In response to facility owner’s requests for more value out of their building information models, CFI-IW was established in 2009 to provide strategic facility information technology planning.
